

ExaCoin (EXA) - Technical Overview

Token Type: Meme / Speculative

Network: Solana Blockchain

Creator: ExaFuture

Token Parameters

Total Supply: 100,000,000 EXA
Burn Rate: 2% per transaction
Max Supply Cap: Fixed, no additional minting

- Distribution:
- 15% Creator Reserve
 - 50% Public Sale
 - 15% Community / Airdrops
 - 10% Marketing
 - 10% Future Reserve

Purpose

ExaCoin is a speculative meme token designed with no inherent utility. Its value is driven by scarcity, community hype, and automatic deflation.

This token has no roadmap, no governance, and no function beyond digital ownership and speculative trading.

Burn Mechanism

Every transaction triggers an automatic 2% burn of the amount transferred.

This decreases circulating supply over time, favoring long-term holders.
